Here is a spreadsheet showing where names of people associated with falsification appeared on the form.   
Of course, these people have not been legally found guilty of wrongdoing...   
A person could have been on this list for various reasons:   
(except enforcement action against Justin Hubbard <https://www.nrc.gov/docs/ML1621/ML16210A216.pdf>)

This person stated in the NRC petition that s/he was ordered to falsify   
Someone stated that s/he observed this person falsifying   
Someone stated that this person was on a crew that was associated with falsifying   
This person stated that s/he did falsify   
Other reasons

Caveats – If someone were on this list and did indeed falsify in one situation, that does not mean that s/he falsified in any given particular survey unit.   
A person’s name being on this list does not mean definitely falsification occurred. So this is just a note as another line of evidence potentially.
